## PRODUCT DESCRIPTION

## ORDERING CODES

### Engraved I.D. Plates & Specialty Tags

S.M.S. I.D. plates are typically 1/16" thick two-ply coloured plastic. Characters are engraved through the durable primary colour to expose the contrasting background colour.

I.D. plates are custom made to order and provide precise quality identification of equipment such as pumps, fans, starters, and air handling units. The size of each plate will be determined by the quantity and size of characters. I.D. plates can be ordered with peel and stick adhesive back or holes for hanging or securing with screws.

PRIMARY COLOUR	CHARACTER COLOUR	COLOUR CODE NO.
Black	White	101
White	Black	102
Red	White	103
White	Red	104
Blue	White	105
