Arrowed Pipe Banding Tape

COLOUR	1"	2"
Yellow	N/A	PBTA-YEL
Green	N/A	PBTA-GRE
Red	N/A	PBTA-RED

Standard pipe banding tape is 5.5 mil thick vinyl, with a pressure sensitive adhesive backing. Tape is available from stock in a variety of colours in 1" and 2" nominal widths by 36 yard long rolls. Arrowed banding tape is an economical alternative to the use of pipe marker arrows and standard banding tape. Directional arrowed tape is 2" wide by 75 yard long rolls with small arrows appearing continuously.

The common application for banding tape is to permanently secure building service pipe markers and provide a 360° reference band next to markers or stencilled legends. With a variety of 10 colours available, a complete custom, colour coded I.D. system could also be designed.
